

Product Name: SST Partner 950 Adjuvant
APVMA Approval No: 90169/127834

Label Name:	SST Partner 950 Adjuvant
-------------	--------------------------

Signal Headings:	READ SAFETY DIRECTIONS BEFORE OPENING OR USING
------------------	--

Constituent Statements:	800 g/kg AMMONIUM SULPHATE 150 g/kg CARBOXYLIC ACID
-------------------------	--

Mode of Action:	
-----------------	--

Statement of Claims:	An adjuvant product for use with glyphosate products as: <ul style="list-style-type: none">- Water Softener- Acidifier- Penetrant- Wetting Agent
----------------------	---

Net Contents:	10 kg - 50 kg
---------------	---------------

Restrains:	
------------	--

Directions for Use:	This section contains file attachment.
---------------------	--

Other Limitations:	
--------------------	--

Withholding Periods:	
----------------------	--

Trade Advice:	
---------------	--

General Instructions:	<p>SST Partner 950 Adjuvant should be used with non-selective herbicides only, as with some selective herbicides use may result in loss of selectivity and therefore crop damage.</p> <p>SST Partner 950 Adjuvant is an adjuvant product for use with Glyphosate herbicides.</p> <p>SST Partner 950 Adjuvant components will help the performance of glyphosate herbicides by:-</p> <p>Acidifying the spray water SST Partner 950 Adjuvant will reduce the effects of "alkaline hydrolysis" ie. breakdown of the glyphosate herbicide in the presence of alkaline water.</p> <p>Increasing the spray droplet spread SST Partner 950 Adjuvant will lower the surface tension of the spray water, thereby improving spray coverage.</p> <p>Softening the spray water SST Partner 950 Adjuvant will reduce the effects of "hard water" ie. water that contains high levels of free calcium and magnesium ions that can cause tie-up of the glyphosate herbicide.</p> <p>Increasing leaf penetration SST Partner 950 Adjuvant will assist in dissolving the waxy cuticular layer on the surface of the leaf thereby allowing faster and more thorough entry of the glyphosate into the plant tissue.</p> <p>MIXING Half fill the spray tank with clean water and start agitation. Add SST Partner 950 Adjuvant to the spray tank. Add the required amount of Glyphosate based product and the remaining water; mix thoroughly. Always maintain adequate agitation during application and use the tank mix promptly. Always consult the herbicide label for exact application rates. Ammonium sulphate may be corrosive to the metal parts of the sprayer. Thoroughly flush tanks, pumps and nozzles with water after use.</p> <p>Compatibility SST Partner 950 Adjuvant is compatible with: 2,4-D 475 (dimethyl and diethanolamine). 2,4-D Ester 680, 2,4-D Amine 625, Oxyfluorfen 240 g/L, Carfentrazone-ethyl 400 g/L, metsulfuron 600 g/kg, chlorsulfuron 750 g/kg, triasulfuron 750 g/kg, Triclopyr 600 g/L, Trifluralin, and fluroxypyr 200 and 400 g/L.</p>
-----------------------	---

Resistance Warning:	
---------------------	--

Precautions:	
--------------	--

Protections:	<p>PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT DO NOT contaminate ponds, streams, rivers or waterways with the chemical or used containers.</p>
--------------	--

Storage and Disposal:	<p>Store in the closed, original container in a dry, cool, well-ventilated area out of direct sunlight. Do not contaminate seed, feed or foodstuff.</p> <p>LDPE Bags: Shake empty bag into spray tank until the bag is empty. Do not dispose of undiluted chemicals on site. Break, crush or puncture and deliver empty packaging to an approved</p>
-----------------------	---

	<p>waste management facility. If an approved waste management facility is not available, bury the empty packaging 500 mm below the surface in a disposal pit specifically marked and set up for this purpose, clear of waterways, desirable vegetation and tree roots, in compliance with the relevant local, state or territory government regulations. Do not burn empty containers or product.</p> <p>HDPE:</p> <p>Triple-rinse containers before disposal. Add rinsings to spray tank. Do not dispose of undiluted chemicals on site.</p> <p>If recycling, replace cap and return clean containers to recycler or designated collection point.</p> <p>If not recycling, replace cap and return clean containers to recycler or designated collection point.</p> <p>If not recycling, break, crush, or puncture and deliver empty packaging to an approved waste management facility. If an approved waste management facility is not available, bury the empty packaging 500 m below the surface in a disposal pit specifically marked and set up for this purpose, clear of waterways, desirable vegetation and tree roots, in compliance with relevant local, state or territory government regulations. Do not burn empty containers or product.</p>
